Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Acidic water
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Agriculture
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Air flow
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Algorithms
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Alluvial valleys
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Analytical techniques
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Anisotropy
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Aquifers
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Arid lands
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).

Augers
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Border irrigation
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).

Brazil
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Calibration
Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).
Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).

California
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Canals
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).
Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Canopies
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Center-pivot irrigation
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).

Channel design
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Channels
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Chlorides
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Climatic data
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Colorado
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Acidic water
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Agriculture
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Air flow
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Algorithms
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Alluvial valleys
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Analytical techniques
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Anisotropy
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Aquifers
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Arid lands
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).

Augers
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Border irrigation
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).

Brazil
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Calibration
Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).
Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).

California
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Canals
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).
Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Canopies
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Center-pivot irrigation
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).

Channel design
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Channels
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Chlorides
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Climatic data
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Colorado
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Computation
Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (2005).
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Computer aided scheduling
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Computer programming
Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Computer software
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Control structures
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Control systems
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).

Cost control
Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).

Coupling
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Critical flow
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).

Crop moisture index
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).

Crops
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Cross sections
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Data analysis
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Delay time
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Design
Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).
Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).
Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).

Discharge measurement
Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Discharge measurements
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Diversion structures
Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Drip irrigation
Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Energy
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).

Environmental impacts
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Estimation
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Evaporation
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Evapotranspiration
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Al-

bert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).
Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).
Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).

Farms

Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Floods

Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).
Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Florida

Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Flow control

Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Flow measurement

Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (2005).
Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Flow rates

Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (2005).
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Flow resistance

Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).

France

Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Friction

Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).

Furrow irrigation

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (2005).

Gas pressure

Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Gates

Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).
Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Geology

Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).

Gradually varied flow

Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Grasses

Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Ground water

Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Ground-water management

Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Ground-water quality

Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Head loss

Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Holes

Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Humidity

Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).

Hydraulic conductivity

Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Hydraulic design

Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).

Hydraulic models

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Hydraulic networks

Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).
Data Reconciliation on the Complex Hydraulic

System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Hydraulic roughness

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).

Hydraulic structures

Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Hydraulics

Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).

Hydrodynamics

Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Hydrologic models

Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).

Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Hydrological models

Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Hydrology

Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Infiltration

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).

Infiltration rate

Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).

Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Irrigation

SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).

Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Irrigation districts

Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Irrigation efficiency

Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (2005).

Irrigation pipes

Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Irrigation practices

Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).

Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).

Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).

Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Irrigation scheduling

Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).

Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).

Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Irrigation systems

Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Jordan

Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).

Kinematic wave theory

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Laboratory tests

Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Landscaping

Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Layered soils

Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Linings

Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).

Losses

Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).

Lysimeters

Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).

Comparison of Measured and FAO-56 Modeled

Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).

Measurement

Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).

Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Mexico

Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Model accuracy

Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Model analysis

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).

Models

Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).

Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Networks

Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Neural networks

Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).

New Mexico

Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).

Open channel flow

Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Open channels

Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).

Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).

Optimization

Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).

Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).

Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).

Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).

Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (2005).

Optimization models

Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Overland flow

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).

Parameters

Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Peak runoff

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Pipeline design

Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Project evaluation

Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Pumping stations

Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Pumps

Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Rainfall

Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Rainfall duration

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Rainfall-runoff relationships

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Remote sensing

SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Residential location

Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Resistance coefficient

Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).

Routing

Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Runoff

Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Runoff coefficient

Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Saline ground water

Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Salinity
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Satellites
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Seepage
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Sensors
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Shallow water
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Simulation
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Simulation models
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Soil compaction
Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Soil water
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Solar radiation
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Solutes
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Spain
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Sprinkler irrigation
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).
Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (2005).

Sprinklers
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).

Statistics
Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Storm Drainage
Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).

Storm drainage
Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).

Stormwater
Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Streamflow
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Streams
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Surface irrigation
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Surface runoff
Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).

Temperature
Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).

Time factors
Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (2005).

Transient flow
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).
Transpiration
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
Trickle irrigation
Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Uniform flow
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (2005).
Uniformity
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Unsaturated flow
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).
Unsteady flow
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).
Volume change
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).
Washington
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).
Water balance
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).
Water consumption
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).
Water demand
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).
Water depth
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (2005).
Water distribution systems
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (2005).
Water levels
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).
Water management
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (2005).
Water resources
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).
Water resources management
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).
Water table
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).
Water tables
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).
Water use
Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).
Wave theory
Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).
Weather data
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).
Wells
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).

Author Index

Agiralioglu, Necati
Discussion of "Explicit Hydraulic Design of Microirrigation Submain Units with Tapered Manifold and Laterals" by John D. Valiantzas. — Gürol Yildirim and Necati Agiralioglu; 131(3), 299 (2005).

Ağıralioğlu, Necati
Discussion of "Inlet Pressure, Energy Cost, and Economic Design of Tapered Irrigation Submains" by John D. Valiantzas. — Gürol Yıldırım and Necati Ağıralioğlu; 131(2), 220-4 (2005).
Closure to "Linear Solution for Hydraulic Analysis of Tapered Microirrigation Laterals" by Gürol Yıldırım and Necati Ağıralioğlu. — Gürol Yıldırım and Necati Ağıralioğlu; 131(5), 490-1 (2005).

Alkhatiri, N.
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (T) (2005).

Allen, R. G.
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Allen, Richard G.
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).
Closure on "Predicting Daily Net Radiation using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Suat Irmak and Richard G. Allen; 131(4), 389-90 (2005).

Anwar, Arif A.
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (T) (2005).

Barua, Gautam
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Bastiaanssen, W. G. M.
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Baum, Melissa C.
Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Baume, Jean-Pierre
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Bautista, E.
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Belaud, Gilles
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Berengena, J.
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Bleiweiss, Max
Discussion of "Predicting Daily Net Radiation Using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Zohrab Samani, Simon Nolin, Max Bleiweiss, and Rhonda Skaggs; 131(4), 388-9 (2005).

Bosu, Santhana
Closure to "Analytical Equation for Variation of Discharge in Drip Irrigation Laterals," by V. Ravikumar, C. R. Ranganathan, and S. Santhana Bosu. — V. Ravikumar, C. R. Ranganathan, and Santhana Bosu; 131(3), 302-3 (2005).

Brouwer, R.
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Burkhalter, J. Philip
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Burt, C. M.
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Burt, Charles M.
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Cadena, Fernando
Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Canivet, Eric
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Carrión Pérez, Pedro
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Chagoya-Amador, B.
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (T) (2005).

Chahar, Bhagu R.
Optimal Design of Parabolic Canal Section. — Bhagu R. Chahar; 131(6), 546-54 (2005).

Chen, Shih-Kai
Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Chen, Wen-Teng
Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Clarke, Derek
Design of Hydraulically Efficient Power-Law Channels with Freeboard. — Arif A. Anwar and Derek Clarke; 131(6), 560-3 (T) (2005).

Clemmens, A. J.
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).
Discussion of "Transition Effects in Flow Over Side Weirs" by Yilmaz Muslu, Ebubekir Yuksel, and Hasan Tozluk. — A. J. Clemmens; 131(4), 392 (2005).
Volume Compensation Method for Routing Irrigation Canal Demand Changes. — E. Bautista and A. J. Clemmens; 131(6), 494-503 (2005).

Clemmens, Albert J.
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Cordeiro, Gilberto
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Davidoff, Baryohay
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Davids, G.
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Deltour, Jean-Luc
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

De Nys, Erwin
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Deras, Jose
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (T) (2005).

Dercas, Nicholas
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).

Di Dio, Pietro
Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Dukes, M. D.
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Dukes, Michael D.
Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Eching, Simon
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Fahimuddin, Mohd
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).

Folton, C.
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (T) (2005).

Frame, Kent
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Furman, A.
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Gates, Timothy K.
Agroecological Impacts from Salinization and Waterlogging in an Irrigated River Valley. — J. Philip Burkhalter and Timothy K. Gates; 131(2), 197-209 (2005).

Gavilán, P.
Reference Evapotranspiration Estimation in a Highly Advective Semiarid Environment. — J. Berengena and P. Gavilán; 131(2), 147-63 (2005).

Ghosh, L. K.
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (T) (2005).

Gorantiwar, S. D.
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).
Closure to "Allocation of Scarce Water Resources Using Deficit Irrigation in Rotational Systems" by S. D. Gorantiwar and I. K. Smout; 131(3), 305-6 (2005).

Gosain, A. K.
Closure to "Estimating Actual Evapotranspiration from Limited Climatic Data Using Neural Computing Technique" by K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri. — K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri; 131(2), 220 (2005).

Granier, J.
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (T) (2005).

Grismer, Mark E.
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Hendawi, M.
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (T) (2005).

Hoffmann, Marc R.
Theory of Seepage into an Auger Hole in a Confined Aquifer. — Gautam Barua and Marc R. Hoffmann; 131(5), 440-50 (2005).

Howell, T. A.
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).

Howes, D. J.
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).

Irmak, Suat
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).
Closure on "Predicting Daily Net Radiation using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Suat Irmak and Richard G. Allen; 131(4), 389-90 (2005).

Islam, Adlul
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Jaber, F. H.
Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Jacobs, J. M.
Using Modified Bellani Plate Evapotranspiration Gauges to Estimate Short Canopy Reference Evapotranspiration. — Suat Irmak, M. D. Dukes, and J. M. Jacobs; 131(2), 164-75 (2005).

Jain, P. K.
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).

Juana, Luis
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Closure to "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sanchez. — Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raul Sanchez; 131(5), 486-7 (2005).

Kisi, Özgür
Discussion of "Estimating Actual Evapotranspiration from Limited Climatic Data Using Neural Computing Technique" by K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri. — Özgür Kisi and Gürol Yildirim; 131(2), 219-20 (2005).
Discussion of "Forecasting of Reference Evapotranspiration by Artificial Neural Networks" by Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic. — Özgür Kisi and Gürol Yildirim; 131(4), 390-1 (2005).

Kovoor, Gicy M.
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Le Gal, Pierre-Yves
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Litrico, Xavier
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Liu, Chen-Wuing
Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

López-Tellez, P.
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (T) (2005).

Losada, Alberto
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Closure to "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sanchez. — Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raul Sanchez; 131(5), 486-7 (2005).

Magallanez, Henry
Analytical Solution for Circular Gates as Flow Metering Structures. — Fernando Cadena and Henry Magallanez; 131(5), 451-6 (2005).

Manzano-Juárez, Juan
Discussion of "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sánchez. — Álvaro Royuela-Tomás, Juan Manzano-Juárez, and Guillermo Palau-Salvador; 131(5), 484-6 (2005).

Matyac, Scott
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

McCuen, Richard H.
Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Merriam, John L.
Discussion of "Night Irrigation Reduction for Water Saving in Medium-Sized Systems" by Bert De Bièvre, Andrés Alvarado, Luis Timbe, Rolando Célleri, and Jan Feyen. — John L. Merriam; 131(2), 218-9 (2005).
Discussion of "Allocation of Scarce Water Resources Using Deficit Irrigation in Rotational Systems" by S. D. Gorantiwar and I. K. Smout. — John L. Merriam; 131(3), 303-5 (2005).

Miller, Grady L.
Analysis of Residential Irrigation Distribution Uniformity. — Melissa C. Baum, Michael D. Dukes, and Grady L. Miller; 131(4), 336-41 (2005).

Mishra, A.
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Mishra, Govinda C.
Stream Multiaquifer Well Interactions. — Govinda C. Mishra and Mohd Fahimuddin; 131(5), 433-9 (2005).

Molle, B.
Measurement Accuracy Analysis of Sprinkler Irrigation Rainfall in Relation to Collector Shape. — M. Hendawi, B. Molle, C. Folton, and J. Granier; 131(5), 477-83 (T) (2005).

Moreno Hidalgo, Miguel Ángel
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Murthy, J. S. R.
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (T) (2005).

Mutziger, A. J.
Evaporation Research: Review and Interpretation. — C. M. Burt, A. J. Mutziger, R. G. Allen, and T. A. Howell; 131(1), 37-58 (2005).
Comparison of Measured and FAO-56 Modeled Evaporation from Bare Soil. — A. J. Mutziger, C. M. Burt, D. J. Howes, and R. G. Allen; 131(1), 59-72 (2005).

Nachabe, Mahmood
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Nandagiri, Lakshman
Sensitivity of the Food and Agriculture Organization Penman–Monteith Evapotranspiration Estimates to Alternative Procedures for Estimation of Parameters. — Lakshman Nandagiri and Gicy M. Kovoor; 131(3), 238-48 (2005).

Nolin, Simon
Discussion of "Predicting Daily Net Radiation Using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Zohrab Samani, Simon Nolin, Max Bleiweiss, and Rhonda Skaggs; 131(4), 388-9 (2005).

Noordman, E. J. M.
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Odhiambo, Lameck O.
Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).

O'Halloran, Tim
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Orang, Morteza
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Ortega Álvarez, José Fernando
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Palau-Salvador, Guillermo
Discussion of "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sánchez. — Álvaro Royuela-Tomás, Juan Manzano-Juárez, and Guillermo Palau-Salvador; 131(5), 484-6 (2005).

Patil, Ramappa G.
Uniform and Critical Flow Computations. — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 131(4), 375-8 (T) (2005).

Pelgrum, H.
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Pereira, Luis S.
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).

Planells Alandi, Patricio
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Provenzano, Giuseppe
Discussion of "Analytical Equation for Variation of Discharge in Drip Irrigation Laterals" by V. Ravikumar, C. R. Ranganathan, and S. Santhana Bosu. — Giuseppe Provenzano; 131(3), 300-2 (2005).
Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Pruitt, William O.
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).

Pumo, Domenico
Simplified Procedure to Evaluate Head Losses in Drip Irrigation Laterals. — Giuseppe Provenzano, Domenico Pumo, and Pietro Di Dio; 131(6), 525-32 (2005).

Raes, Dirk
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Raghuwanshi, N. S.
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Ramasastri, K. S.
Closure to "Estimating Actual Evapotranspiration from Limited Climatic Data Using Neural Computing Technique" by K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri. — K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri; 131(2), 220 (2005).

Ranganathan, C. R.
Closure to "Analytical Equation for Variation of Discharge in Drip Irrigation Laterals," by V. Ravikumar, C. R. Ranganathan, and S. Santhana Bosu. — V. Ravikumar, C. R. Ranganathan, and Santhana Bosu; 131(3), 302-3 (2005).

Rathie, Pushpa N.
Discussion of "Direct Equations for Hydraulic Jump Elements in Rectangular Horizontal Channel" by Shri Ram Chaurasia. — Prabhata K. Swamee and Pushpa N. Rathie; 131(3), 298 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (T) (2005).

Ravikumar, V.
Closure to "Analytical Equation for Variation of Discharge in Drip Irrigation Laterals," by V. Ravikumar, C. R. Ranganathan, and S. Santhana Bosu. — V. Ravikumar, C. R. Ranganathan, and Santhana Bosu; 131(3), 302-3 (2005).

Ribot-Bruno, José
Hydraulic Modeling of an Automatic Upstream Water-Level Control Gate. — Xavier Litrico, Gilles Belaud, Jean-Pierre Baume, and José Ribot-Bruno; 131(2), 176-89 (2005).

Ritter, William F.
State-of-the-Art Evapotranspiration Prediction. — William F. Ritter; 131(1), 1 (2005).
Editor's Note. — William F. Ritter; 131(3), 227 (2005).
Editor's Note. — William F. Ritter; 131(5), 395 (2005).

Rodríguez-Sinobas, Leonor
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).
Closure to "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sanchez. — Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raul Sanchez; 131(5), 486-7 (2005).

Ross, Mark
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Royuela-Tomás, Álvaro
Discussion of "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sánchez. — Álvaro Royuela-Tomás, Juan Manzano-Juárez, and Guillermo Palau-Salvador; 131(5), 484-6 (2005).

Said, Ahmed
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Salazar, Raquel
Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Samani, Zohrab
Discussion of "Predicting Daily Net Radiation Using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Zohrab Samani, Simon Nolin, Max Bleiweiss, and Rhonda Skaggs; 131(4), 388-9 (2005).
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (T) (2005).

Sammis, Ted
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (T) (2005).

Sanchez, C. A.
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Sanchez, Raul
Closure to "Analytical Relationships for Designing Rectangular Drip Irrigation Units" by Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raúl Sanchez. — Luis Juana, Alberto Losada, Leonor Rodríguez-Sinobas, and Raul Sanchez; 131(5), 486-7 (2005).

Sánchez, Raúl
Analytical Expressions for Hydraulic Calculation of Trapezoidal Drip Irrigation Units. — Luis Juana, Leonor Rodríguez-Sinobas, Raúl Sánchez, and Alberto Losada; 131(5), 420-32 (2005).

Sanfilippo, Franck
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Sau, Jacques
Data Reconciliation on the Complex Hydraulic System of Canal de Provence. — Jean-Luc Deltour, Eric Canivet, Franck Sanfilippo, and Jacques Sau; 131(3), 291-7 (2005).

Schneider, Lauren E.
Statistical Guidelines for Curve Number Generation. — Lauren E. Schneider and Richard H. McCuen; 131(3), 282-90 (2005).

Schuurmans, J.
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Sen, D. J.
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).

Shukla, S.
Hydrodynamic Modeling Approaches for Agricultural Storm Water Impoundments. — F. H. Jaber and S. Shukla; 131(4), 307-15 (2005).

Sinai, G.
Water Management of Irrigated-Drained Fields in the Jordan Valley South of Lake Kinneret. — G. Sinai and P. K. Jain; 131(4), 364-74 (2005).

Singh, R.
Comparison of Gradually Varied Flow Computation Algorithms for Open-Channel Network. — Adlul Islam, N. S. Raghuwanshi, R. Singh, and D. J. Sen; 131(5), 457-65 (2005).
Development and Application of an Integrated Optimization-Simulation Model for Major Irrigation Projects. — A. Mishra, R. Singh, and N. S. Raghuwanshi; 131(6), 504-13 (2005).

Singh, Sushil K.
Discussion of "Direct Equations for Hydraulic Jump Elements in Rectangular Horizontal Channel" by Sri Ram Chaurasia. — Sushil K. Singh; 131(3), 305 (2005).
Rate and Volume of Stream Flow Depletion due to Unsteady Pumping. — Sushil K. Singh; 131(6), 539-45 (2005).

Skaggs, Rhonda
Discussion of "Predicting Daily Net Radiation Using Minimum Climatological Data" by S. Irmak, A. Irmak, J. W. Jones, T. A. Howell, J. M. Jacobs, R. G. Allen, and G. Hoogenboom. — Zohrab Samani, Simon Nolin, Max Bleiweiss, and Rhonda Skaggs; 131(4), 388-9 (2005).
Measuring On-Farm Irrigation Efficiency with Chloride Tracing under Deficit Irrigation. — Zohrab Samani, Ted Sammis, Rhonda Skaggs, N. Alkhatiri, and Jose Deras; 131(6), 555-9 (T) (2005).

Slack, Donald
Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Smith, Martin
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Estimating Evaporation from Bare Soil and the Crop Coefficient for the Initial Period Using Common Soils Information. — Richard G. Allen, William O. Pruitt, Dirk Raes, Martin Smith, and Luis S. Pereira; 131(1), 14-23 (2005).

Smout, I. K.
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. I: Method. — I. K. Smout and S. D. Gorantiwar; 131(3), 254-63 (2005).
Multilevel Approach for Optimizing Land and Water Resources and Irrigation Deliveries for Tertiary Units in Large Irrigation Schemes. II: Application. — S. D. Gorantiwar and I. K. Smout; 131(3), 264-72 (2005).
Closure to "Allocation of Scarce Water Resources Using Deficit Irrigation in Rotational Systems" by S. D. Gorantiwar and I. K. Smout. — S. D. Gorantiwar and I. K. Smout; 131(3), 305-6 (2005).

Snyder, Richard L.
Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California. — Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer; 131(3), 249-53 (2005).

Solomon, Ken
Prediction Accuracy for Projectwide Evapotranspiration Using Crop Coefficients and Reference Evapotranspiration. — Richard G. Allen, Albert J. Clemmens, Charles M. Burt, Ken Solomon, and Tim O'Halloran; 131(1), 24-36 (2005).

Speelman, Stijn
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

Stankovic, Miomir
Closure to "Forecasting of Reference Evapotranspiration by Artificial Neural Networks" by Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic. — Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic; 131(4), 391-2 (2005).

Stone, Jeffry
Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Strand, R. J.
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).

Sudheer, K. P.
Closure to "Estimating Actual Evapotranspiration from Limited Climatic Data Using Neural Computing Technique" by K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri. — K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri; 131(2), 220 (2005).

Swamee, Prabhata K.
Discussion of "Direct Equations for Hydraulic Jump Elements in Rectangular Horizontal Channel" by Shri Ram Chaurasia. — Prabhata K. Swamee and Pushpa N. Rathie; 131(3), 298 (2005).
Exact Equations for Critical Depth in a Trapezoidal Canal. — Prabhata K. Swamee and Pushpa N. Rathie; 131(5), 474-6 (T) (2005).

Tarjuelo Martín-Benito, José María
Pumping Selection and Regulation for Water-Distribution Networks. — Patricio Planells Alandi, Pedro Carrión Pérez, José Fernando Ortega Álvarez, Miguel Ángel Moreno Hidalgo, and José María Tarjuelo Martín-Benito; 131(3), 273-81 (2005).

Tasumi, Masahiro
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Temesgen, Bekele
Comparison of Some Reference Evapotranspiration Equations for California. — Bekele Temesgen, Simon Eching, Baryohay Davidoff, and Kent Frame; 131(1), 73-84 (2005).

Thoreson, B. P.
SEBAL Model with Remotely Sensed Data to Improve Water-Resources Management under Actual Field Conditions. — W. G. M. Bastiaanssen, E. J. M. Noordman, H. Pelgrum, G. Davids, B. P. Thoreson, and R. G. Allen; 131(1), 85-93 (2005).

Todorovic, Branimir
Closure to "Forecasting of Reference Evapotranspiration by Artificial Neural Networks" by Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic. — Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic; 131(4), 391-2 (2005).

Trajkovic, Slavisa
Temperature-Based Approaches for Estimating Reference Evapotranspiration. — Slavisa Trajkovic; 131(4), 316-23 (2005).
Closure to "Forecasting of Reference Evapotranspiration by Artificial Neural Networks" by Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic. — Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic; 131(4), 391-2 (2005).

Trezza, Ricardo
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Valiantzas, John D.
Hydraulic Analysis of Multidiameter Center-Pivot Sprinkler Laterals. — John D. Valiantzas and Nicholas Dercas; 131(2), 137-46 (2005).
Closure to "Inlet Pressure, Energy Cost, and Economic Design of Tapered Irrigation Submains" by John D. Valiantzas. — John D. Valiantzas; 131(2), 224-5 (2005).
Closure to "Explicit Hydraulic Design of Microirrigation Submain Units with Tapered Manifold and Laterals" by John D. Valiantzas. — John D. Valiantzas; 131(3), 299-300 (2005).
Modified Hazen–Williams and Darcy–Weisbach Equations for Friction and Local Head Losses along Irrigation Laterals. — John D. Valiantzas; 131(4), 342-50 (2005).
Discussion of "Linear Solution for Hydraulic Analysis of Tapered Microirrigation Laterals" by Gürol Yildirim and Necati Ağirlioğlou. — John D. Valiantzas; 131(5), 487-9 (2005).

Vandersypen, Klaartje
Predicting Soil Salinity under Various Strategies in Irrigation Systems. — Erwin De Nys, Dirk Raes, Pierre-Yves Le Gal, Gilberto Cordeiro, Stijn Speelman, and Klaartje Vandersypen; 131(4), 351-7 (2005).

van Overloop, P. J.
Multiple-Model Optimization of Proportional Integral Controllers on Canals. — P. J. van Overloop, J. Schuurmans, R. Brouwer, and C. M. Burt; 131(2), 190-6 (2005).

Vázquez-Fernández, E.
Comparison of Water Distribution Uniformities between Increased-Discharge and Continuous-Flow Irrigations in Blocked-End Furrows. — E. Vázquez-Fernández, P. López-Tellez, and B. Chagoya-Amador; 131(4), 379-82 (T) (2005).

Vomacka, Jeff
Methodology for Estimating Specific Yield in Shallow Water Environment Using Continuous Soil Moisture Data. — Ahmed Said, Mahmood Nachabe, Mark Ross, and Jeff Vomacka; 131(6), 533-8 (2005).

Wahlin, B. T.
Simulation of Automatic Canal Control Systems. — A. J. Clemmens, E. Bautista, B. T. Wahlin, and R. J. Strand; 131(4), 324-35 (2005).

Walker, Wynn R.
Multilevel Calibration of Furrow Infiltration and Roughness. — Wynn R. Walker; 131(2), 129-36 (2005).

Warrick, A. W.
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).

Wong, Tommy S. W.
Influence of Loss Model on Design Discharge of Homogeneous Plane. — Tommy S. W. Wong; 131(2), 210-7 (2005).
Assessment of Time of Concentration Formulas for Overland Flow. — Tommy S. W. Wong; 131(4), 383-7 (T) (2005).

Wright, James L.
FAO-56 Dual Crop Coefficient Method for Estimating Evaporation from Soil and Application Extensions. — Richard G. Allen, Luis S. Pereira, Martin Smith, Dirk Raes, and James L. Wright; 131(1), 2-13 (2005).
Satellite-Based Energy Balance to Assess Within-Population Variance of Crop Coefficient Curves. — Masahiro Tasumi, Richard G. Allen, Ricardo Trezza, and James L. Wright; 131(1), 94-109 (2005).

Wright, Wesley C.
Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).

Yakowitz, Diana
Multicriteria Analysis in an Irrigation District in Mexico. — Raquel Salazar, Jeffry Stone, Diana Yakowitz, and Donald Slack; 131(6), 514-24 (2005).

Yildirim, Gürol
Discussion of "Estimating Actual Evapotranspiration from Limited Climatic Data Using Neural Computing Technique" by K. P. Sudheer, A. K. Gosain, and K. S. Ramasastri. — Özgür Kisi and Gürol Yildirim; 131(2), 219-20 (2005).
Discussion of "Explicit Hydraulic Design of Microirrigation Submain Units with Tapered Manifold and Laterals" by John D. Valiantzas. — Gürol Yildirim and Necati Agiralioglu; 131(3), 299 (2005).
Discussion of "Forecasting of Reference Evapotranspiration by Artificial Neural Networks" by Slavisa Trajkovic, Branimir Todorovic, and Miomir Stankovic. — Özgür Kisi and Gürol Yildirim; 131(4), 390-1 (2005).

Yıldırım, Gürol
Discussion of "Inlet Pressure, Energy Cost, and Economic Design of Tapered Irrigation Submains" by John D. Valiantzas. — Gürol Yıldırım and Necati Ağıralioğlu; 131(2), 220-4 (2005).
Closure to "Linear Solution for Hydraulic Analysis of Tapered Microirrigation Laterals" by Gürol Yıldırım and Necati Ağıralioğlu. — Gürol Yıldırım and Necati Ağıralioğlu; 131(5), 490-1 (2005).

Yoder, Ronald E.
Effects of Vapor-Pressure Deficit and Net-Irradiance Calculation Methods on Accuracy of Standardized Penman-Monteith Equation in a Humid Climate. — Ronald E. Yoder, Lameck O. Odhiambo, and Wesley C. Wright; 131(3), 228-37 (2005).

Yu, Wei-Sheng
Laboratory Investigation of Plough Sole Reformation in a Simulated Paddy Field. — Chen-Wuing Liu, Wei-Sheng Yu, Wen-Teng Chen, and Shih-Kai Chen; 131(5), 466-73 (2005).

Zerihun, D.
Coupled Surface-Subsurface Flow Model for Improved Basin Irrigation Management. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(2), 111-28 (2005).
Infiltration under Variable Ponding Depths of Water. — A. W. Warrick, D. Zerihun, C. A. Sanchez, and A. Furman; 131(4), 358-63 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. I. Model Development. — D. Zerihun, A. Furman, A. W. Warrick, and C. A. Sanchez; 131(5), 396-406 (2005).
Coupled Surface–Subsurface Solute Transport Model for Irrigation Borders and Basins. II. Model Evaluation. — D. Zerihun, C. A. Sanchez, A. Furman, and A. W. Warrick; 131(5), 407-19 (2005).
